

Seminar on Neuroscience, Culture and Society

# Open lecture with Professor Nikolas Rose

”The Urban Brain: Living in the Neuro Social City”

22ND OF MARCH, 14.15-16, DEPARTMENT OF ARTS AND CULTURAL SCIENCES, LUX, ROOM C121, HELGONAVÄGEN 3, LUND.

**Nikolas Rose** is professor of sociology at Kings’s College London. His research has centred on the sociology of psychiatry and health, specifically how developments in science have altered conceptions of human identity and governance.

He is the author of several well-known books on this topic such as *Governing the Soul: The Shaping of the Private Self and The Politics of Life Itself: Biomedicine, Power, and Subjectivity in the Twenty-First Century*. Together with Joelle M Abi-Rached he has co-authored *Neuro: The New Brain Sciences and the Management of the Mind* (2013) in which the authors describe the developments leading to the influence of neuroscience outside medicine.

## About our research group

This open lecture is organized by The Cultural Studies Group of Neuroscience (Bagadilico) and is part of the open Medical Humanities Seminar series hosted by the Department of Arts and Cultural Sciences.

The research carried out by the members of The Cultural Studies Group of Neuroscience addresses how cultural practices and phenomena are influenced and shaped by neuroscientific developments. The members of the research group are particularly interested in how images of the human and human brain are reproduced, and how neuroscientific knowledge is produced and mediated. Several of the projects are carried out in medical settings, in clinics and laboratories, and in collaboration with neuroscientists.
